I would like to invite Brent and Lisa to meet with us and Larry next week.

Liz – I can contact Larry and ask him if he would have some time to meet with us.

I think it is a good idea to talk to Larry as well (as Paula suggested). More from a standpoint of finding out what and where the hazards are. If there are open shafts or any hole, I would like to know about them. This goes for all sites really. It struck me last night that we may have some real risks out there if the hazards are covered with snow. I had that happen to me once and fortunately only one leg went thru and I was able to crawl back from the edge.

I included our BLM partners as well in the hopes that they could provide insight on the type and extent of hazards we might face during the high flow sampling.

Dan,

Should we set up a time to talk with Nathan next week about the locations? Or explain the liability details that Andrea sent over to us?

Liz

Nathan – Thank you for your response. I forwarded your e:mail to Liz (Elizabeth) as she is coordinating all of the access. Richard is also out of the country on vacation and will be back on April 29th and can work with Liz and you on access to the sample locations above Eureka.

Richard / Paula,

Larry just forwarded this to me. I note that Elizabeth used the wrong email address when she tried to send it to me.

I will review and revise ASAP. Conceptually, we have no issue granting access to Sunnyside property. There are, however, some potential safety risks and I need to get a good understanding of where you are proposing to sample on Sunnyside property above Eureka. That said, I propose that we execute a consent for the sample points between Silverton and Eureka on the Animas initially and then execute another agreement for points above. This should allow EPA to get its high-flow sampling done while we identify the other properties EPA wants to sample.

I am in Russia at the moment and for the rest of the week, but will do my best to move things along from afar.

Thanks,

Nathan

Nathan-

We received this on 15th.

Larry

Hi Larry and Nathan,

I zipped the location maps, to reduce the size, please let me know if these make it to you.

Attached is the sampling location map (Figure 2) associated with the locations we've identified as being owned by Sunnyside. Below is the location IDs with the associated mine claims that are owned by Sunnyside. I have also attached the Consent For Assess form that we provided you last week. Please let us know if you have any questions.

Figure 1 includes the area near the Mayflower Mill Area. If additional sampling locations in this area need to be added to our sampling effort we can try to accommodate that. If you could let us know if there are locations that we aren't sampling that Sunnyside had intended to sample that would be great.

Thanks,

Liz
